

Milestone 3 Summary

CSC 648/848 Fall 2021 Section 02 Team 06

Nov 2nd, 2021

Summary of feedback:

Professor Villar found all of our core functionality to be satisfactory. At the time of the review, our group was on track in our development process. Not much was said beyond this, as the project reviews were cut way short due to an unexpected power outage.

Tasks to handle:

One notable error in our implementation happened during our presentation to the professor. While doing the demo, the test user's session was terminated inadvertently by the server. This was a result of a bug in our session expiration time. Immediately after the progress check, we had a member look into the issue and amend it.

Since most of our functional specifications were completed by the time the Milestone 3 review occurred, much of our energy going forward will be directed to polishing up our product both visually and functionally. Milestone 4 helped the group take notice of a few bugs in our frontend and backend logic, so that was the main focus of the later half of the semester.

Functional requirements committed for delivery:

The following is a list of the Priority 1 functions for our team's project.

- Users shall be able to register for a personal account.
- Users shall be able to log into their account.
- Users shall be able to contact each other for inquiries via email.
- Users shall be able to list one or more units/rooms to be rented.
- Users shall be able edit posted listings.
- Users shall be able to delete listings.
- Users shall be able to search for rooms to rent.
- Users shall be able to rent a room alone or with roommates.
- Users shall be able to find new roommates. Users shall be able to post and search roommate listings to find others with similar interests.
